

CHEROKEE INDIAN HOSPITAL

Cherokee Indian Hospital

Concrete Installation

Hospital

Owle Construction, LLC provided a turn-key concrete installation for the new Cherokee Indian Hospital that included all footings, foundation walls, slabs, and sitework concrete. The 150,000 square foot facility houses numerous programs including in-patient care, integrated care outpatient services, emergency services, eye clinic, dental clinic, lab, pharmacy, complimentary therapies, and physical therapy. The Integrated Project Delivery (IPD) contracting method was used to execute this project. Owle Construction participated in this collaborative approach that included input from tribal elders, artists, students, and tribal members in the design and construction effort in order to reduce waste and optimize efficiency.
